

the name and place of the manufacturer (manufacturer's authorized person) and importer and their contact information;

the production month and year of the low-voltage equipment and/or information on the place where the production year is marked or on the way it can be identified.

5. Operation manuals shall be made in Russian and in (an) official language(s) of the Customs Union member state if so required by the laws of the Customs Union member state(s).

Operation manuals shall be made in the form of hardcopies. An electronic set of operation manuals may be enclosed therewith. Operation manuals to be attached to non-household low-voltage equipment may be made in the electronic form only.

Article 6. Ensuring Conformity with Safety Requirements

1. The conformity of low-voltage equipment with these Customs Union Technical Regulations is ensured either through the direct observance of their safety requirements or through the observance of the requirements specified by the standards included in the List of Standards which, if applied on a voluntary basis, ensure that the requirements of these Customs Union Technical Regulations are observed.

2. Methods of examinations (tests) and measurements applicable to low-voltage equipment are set forth in the standards included in the List of Standards containing rules and methods of examinations (tests) and measurements, including sampling rules, that are necessary for the application and observance of the requirements of these Customs Union Technical Regulations and for the conduct of product conformity assessment/approval procedures.

Article 7. Conformity Approval

1. Prior to coming out into circulation on the market, low-voltage equipment must undergo conformity approval procedures to confirm its conformity with safety requirements of these Customs Union Technical Regulations.

The conformity of low-voltage equipment is to be approved according to appropriate schemes as specified in the Guidelines for the Application of Model Conformity Assessment/Approval Schemes in the Customs Union Technical Regulations adopted by the Customs Union Commission (hereinafter referred to as "the Commission").

2. Low-voltage equipment included in the List specified in the Annex to these Customs Union Technical Regulations is subject to conformity approval in the form of certification (Schemes 1c, 3c and 4c).

Low-voltage equipment that is not included in the above-mentioned List is subject to conformity approval in the form of declaration of conformity (Schemes 1d, 2d, 3d, 4d and 6d). The selection between conformity declaration schemes for low-voltage equipment that is not included in the above-mentioned List is made by the manufacturer (manufacturer's authorized person) and/or importer.

As may be decided by the manufacturer (manufacturer's authorized person) and/or importer, the conformity approval of low-voltage equipment that is not included in the above-mentioned List may be carried out in the form of certification in accordance with clause 5 hereof.
